Stronger, Smarter, Better Through Innovation

is more than just a slogan. It is the heart and soul behind every Sno-Way product.

It is the relentless pursuit to design and manufacture the most durable and efficient plows.

It is what makes the Sno-Way name the strongest in the industry.
Stronger, Smarter, Better Through Innovation is more than just a slogan. It is the heart and soul behind every Sno-Way product. It is the relentless pursuit to design and manufacture the most durable and efficient plows. It is what makes the Sno-Way name the strongest in the industry.

SNO-WAY INNOVATIONS

Ground Hugger™ Plows

Double Hinge Plows

E-Z Switch™ Wing System

No Gap Hinge Mechanism

MaxADJUST™ Leveling System

Down Pressure® Hydraulics System

4-Sight™ Lighting System

Intuitive Wireless Control Design

E-Z Fit Snow Deflector

EIS™ Wiring System

How Sno-Way Helps You **MOVE MORE SNOW**.

### 1 Down Pressure® Hydraulic System

- Sno-Way’s Down Pressure® Hydraulics System increases snow removal efficiency by 30%

- **250 LBS + DOWNFORCE**
- **30% MORE EFFICIENT**
- SCRAPES DOWN GOING FORWARD
- KEEPS BLADE ON THE GROUND WHEN BACK DRAGGING

### 2 Single and Double Hinge

Whether you’re looking to plow out your driveway, help out a neighbor or two – or upfitting a downsized vehicle in your fleet, Sno-Way 22 Series plows give you BIG BLADE RESULTS in a compact snow plow package. TWO blade sizes – 6’-8” and 7’-6” – each 22” high, help you meet your non-commercial plowing application head-on.

Easy to use, durable and faster than your neighbor’s snow blower, Sno-Way 22 Series plows make quick and easy work of Ole’ Man Winter.

FEATURES

» Patented Ground Hugger™ Blade Design
  - Keeps Plow on the Ground
» Ultra-High Strength Steel Components
» Polycarbonate Blade Skin
» Drive-In Truck Mount System
» Speciﬁc Angle and Raise Cylinder Designs – Special Designs are Lighter Weight with Same Force as Larger Cylinders
» Special Design Trip Springs
» Patented Shock-Killer™ Trip System
» Optional Down Pressure® Hydraulics System
  - Scrapes clean forward and back dragging
  - Increases snow-moving efficiency 30%
» EIS™ – Energy Interruption System
  - Down-time reduction
  - Corrosion elimination
  - Plug and play design
» Triple-Coat Protection
  - Zinc Phosphate Wash
  - Automotive E-Coat Primer
  - Military Grade Powder Coat Finish

DID YOU KNOW

Sno-Way was the first to use replaceable/interchangeable blade skins – polycarbonate, steel.

Control your snow-moving machine with a touch of a button using Sno-Way’s Wireless or Wired Pro Control II™

**DID YOU KNOW?**
Sno-Way was the first to use replaceable/interchangeable blade skins – polycarbonate, steel. Sno-Way is the only plow manufacturer to offer patented wireless plow control options. See page 26 for more.

*S Plow weight does not include weight of vehicle mount

**Move it.**
Visit snoway.com for video, updates and so much more.
Sno-Way plows are renowned for their high-strength, quality and durability. The 26 series is no exception. Sno-Way designed the 26 Series Snow Plow specifically for the 1/2 ton truck market. The 26 has all of the same standard features as Sno-Way’s commercial plow line without the extra weight: High-strength steel FlexForce™ frame construction, heavy-duty A-frame, patented EIS™ lighting technology, direct linkage lifting system and an ultra-responsive hydraulic package. You’ll enjoy rock-solid performance with this compact plow package all winter long.

FEATURES

- Patented Ground Hugger Blade Design
  - Keeps Plow on the Ground
- Drive In Truck Mount System
- Pre-Drilled Top Blade Rail
  - Allows for E-Z Installation of E-Z Fit Deflector
- Robust Full-Load Trip Springs
  - Reduces Return Shock to Truck and Driver
- Optional Down Pressure™ Hydraulic System
  - Scrapes clean forward and back dragging
  - Increases snow-moving efficiency 30%
- EIS™ – Energy Interruption System
  - Down-time reduction
  - Corrosion elimination
  - Plug and play design
- Triple-Coat Protection
  - Zinc Phosphate Wash
  - Automotive E-Coat Primer
  - Military Grade Powder Coat Finish

Sno-Way was the first to use laser cutting and robotic welding in the manufacture of snow plows. Sno-Way plows are renowned for their high-strength, quality and durability. The 26 series is no exception. Sno-Way designed the 26 Series Snow Plow specifically for the 1/2 ton truck market. The 26 has all of the same standard features as Sno-Way’s commercial plow line without the extra weight: High-strength steel FlexForce™ frame construction, heavy-duty A-frame, patented EIS™ lighting technology, direct linkage lifting system and an ultra-responsive hydraulic package. You’ll enjoy rock-solid performance with this compact plow package all winter long.

Superior Plow Performance Without the Weight.

**FEATURES**

- Patented Ground Hugger Blade Design
- Drive In Truck Mount System
- Pre-Drilled Top Blade Rail
- Robust Full-Load Trip Springs
- Optional Down Pressure™ Hydraulic System
- EIS™ – Energy Interruption System
- Triple-Coat Protection
- Did You Know? Sno-Way was the first to develop a direct linkage system. This lifting system provides the highest stacking height in the industry and prevents vehicle “chain slap” stress.

Visit snoway.com for video, updates and so much more.
The 26R is a revolutionary plow for 1/2 ton trucks providing more snow moving capability and flexibility than any other plow in the industry for this series of trucks. The 26R is built using high strength steel to provide performance and durability, without added weight which makes this the perfect snow moving machine for 1/2 ton trucks. The "R" in the model identifier refers to the Revolution series of plows including the 26R, 29R and Revolution HD models. These plows are designed with patented hydraulic end wings that can be controlled together or independently to move the snow where you want it at any time. Each wing can be moved from a straight out position into a 90 degree orientation to the main blade – effectively creating a box plow. This patented dual-hinge plow design provides you the ability to move up to 3.6 cubic yards of snow which is double the closest competitor's V plow or expandable plow! Engage the Patented Down-Pressure® Hydraulics System that increases snow moving capacity another 30% and you have the ultimate snow cleaning machine.

### FEATURES

CONSIDER THESE PRODUCTS FOR GREATER EFFICIENCY AND SNOW MOVING CAPACITY:

Tough. Reliable. Built to perform day in and day out. Winter after grueling winter. As a professional plower, you depend on the steel in front of your truck to move your business ahead. That’s why more and more contract plowers are using Sno-Way’s 29HD Series. The 29HD has all of the desirable characteristics in an extreme-duty plow: High-strength steel moldboard and A-frame construction; fast, responsive hydraulics; and optimized blade geometry for exceptional snow-rolling performance. Engage Sno-Way’s optional patented Down Pressure® snow plow hydraulic system controlled wirelessly and watch your efficiency and profits soar.

Sno-Way 29HD’s are designed to upfit on HD half-ton trucks up to one-ton vehicle applications. The 29HD Series is available in two hardworking blade sizes – 7'-6” and 8’. For even more productivity, ask your Sno-Way retailer about exclusive Sno-Way accessories for your blade.

Visit snoway.com for video, updates and so much more.
The 29R stands out from the crowd with the greatest possible snow moving flexibility and capacity for your plow truck. No more machine limitations! The “R” in the model identifier refers to the Revolution series of plows. These plows are designed with patented hydraulic end wings that can be controlled together or independently to move the snow where you want it at any time. Each wing can be moved from a straight out position into a 90 degree orientation to the main blade – effectively creating a box plow. This patented dual-hinge plow design provides you the ability to move up to 4.8 cubic yards of snow which is double the closest competitor’s V plow or expandable plow! Engage the Patented Down-Pressure™ Hydraulics System that increases snow moving capacity another 30% and you have the ultimate snow clearing machine.

**Features**

- **Patented Ground Hugger™ Blade Design**
  - Keeps Plow on the Ground
- **Drive-in Truck Mount System**
- **Pre-Drilled Top Blade Rail**
  - Allows for E-Z Installation of E-Z Fit Deflector
- **Patented Shock Killer™ Trip Return System**
  - Reduces Return Shock to Truck and Driver
- **Down Pressure™ Hydraulics System**
  - Scrapes clean forward and back dragging
  - Increases snow-moving efficiency 30%
- **EIS™ – Energy Interruption System**
  - Down-time reduction
  - Corrosion elimination
  - Plug and play design
- **Triple-Coat Protection**
  - Zinc Phosphate Wash
  - Automotive E-Coat Primer
  - Military Grade Powder Coat Finish

**Commercial 29R Series**

- Fits HD 1/2 Ton to 1 Ton Trucks
- Blade Width: 106” x 92” x 29”
- Weight: 705 lbs.
- Cutting Edge: 3/8” x 6” (PRO Proprietary)
- Angle of Plowing: 30°
- Blade Height: 92”
- Weight: 705 lbs.
- Cutting Edge: 3/8” x 6” (PRO Proprietary)

**Snow Moving Capacity**

- 29R Series at 90° Angle: 4.8 Cubic Yards
- 29R Series at 45° Angle: 3.9 Cubic Yards
- 29R Series: 1.8 Cubic Yards

**Representative Vehicle Applications**

- Chevrolet: K1500 HD Silverado, 2500 Silverado, 2500 Suburban, 2500 Avalanche, 3500 Silverado, 3500 HD Chass. 4x2
- GMC: 2500 Sierra, 2500 Suburban, 2500 Yukon XL, 3500 Sierra
- Dodge: Ram 2500 Pickup, Ram 3500 Pickup, Chass.Cab 4x2
- Ford: F-250 Super Duty, F-350 Super Duty

**Poly Blade Kit**

Sno-Way is the only plow manufacturer that does not require headlight relays or modules in its electrical system. See page 24 for Sno-Way’s EIS™ system.

Visit snoway.com for video, updates and so much more.
The 29THD is built to perform day in and day out. This plow is built using our 29HD platform, so you know it is built tough and reliable. As a professional plower, you depend on the steel in front of your truck to move your business ahead. The Sno-Way 29THD series has all of the desirable characteristics in an extreme duty plow. The high-strength steel moldboard and trip-edge technology ensures that only the base angle trips when encountering an obstacle, NOT the entire blade. This means you won’t lose the load you have been pushing. This plow features our easy-to-adjust compression springs to control your trip strength and our Shock Killer™ system that softens the trip impact on your moldboard and truck. Engage Sno-Way’s optional patented Down Pressure® snow plow hydraulic system controlled wirelessly and watch your efficiency and profits soar.

* Plow weight does not include weight of vehicle mount.
The 29VHD is the top of the line in Vee Plow technology. The unique Ground Hugger blade design keeps the plow on the ground to clean more snow which is rather difficult for a V-plow. To enhance cleaning, Sno-Way invented the patented MaxADJUST™ Leveling System - which is a single adjusting arm blade leveling system. This simply allows the operator to adjust the center hinge for perfect plowing alignment and eliminate a snow trail. With the Down Pressure® Hydraulic System as standard equipment, this plow will clean better and cut 30% off of your plowing time. While V-Plows are infamous for having obstacle tripping difficulty, the Sno-Way 29VHD V-Plow handles obstructions with ease utilizing a patented Shock Killer™ Trip Return System which reduces blade return shock to the truck and driver. Add the optional E-Z Switch™ Wings and you have the professional plower’s dream plow.

Sno-Way’s Patented MaxADJUST™ Leveling System

This easily accessible system allow the user to make adjustments while standing in front of the plow instead of from underneath. This system allows for easy use on fleets that use more than one type of truck model because there is no plow frame disassembly necessary for proper fit to each truck.

FEATURES

» Patented MaxADJUST™ Leveling System
» Patented Ground Hugger™ Blade Design
  • Keeps Plow on the Ground
» Double Acting Wing Cylinders
  • Maximum Force Forward and Back
» Tube Steel/Tab-Slot and Lock Construction
  • Engineered for Load Force Absorption
  • Engineered to Last
» Pre-Drilled Top Blade Rail
  • Allows for E-Z Installation of E-Z Fit Deflector
» Custom designed to accept the E-Z Switch™ Wings
» Patented Shock Killer™ Trip Return System
  • Reduces Return Shock to Truck and Driver

» Fast-Force Hydraulic System
» EIS™ – Energy Interruption System
  • Down-time reduction
  • Corrosion elimination
  • Plug and play design
» Down Pressure® Hydraulics System
  • Scrapes clean forward and back dragging
  • Increases snow-moving efficiency 30%
» Triple-Coat Protection
  • Zinc Phosphate Wash
  • Automotive E-Coat Primer
  • Military Grade Powder Coat Finish

Add the optional E-Z Switch™ Wings and you have the professional plower’s dream plow.
The Revolution™ HD Series Snowplow is designed to flat out move more snow for the most demanding professional. The patented fully controllable, independently moveable 13-1/2" wide wings allow you to make your plow a full open plow to a box end plow in a matter of seconds. While other “expandable” plows have wings that move out and forward 20 degrees, the Revolution HD allows the operator to move the independent hydraulic wings to tackle any difficult situation. When you combine the fully hydraulic independent wings with the ability to also angle the plow, the operator will fit through the tightest areas while still capturing up to 6.1 cubic yards of snow. Also included in this beast of a machine is the DownPressure® hydraulic system which delivers an additional 250 pounds of down force on the cutting edge with the push of a button. The Revolution™ HD Series snow plow with patented Down Pressure® on a one ton or larger truck will cut your plowing time in half easily when compared against any plow in the market.

CONSIDER THESE PRODUCTS FOR GREATER EFFICIENCY AND SNOW MOVING CAPACITY:

The 32 Contractor Series snow plow offers snow removal professionals a rugged straight plow that combines close tolerance manufacturing, industry leading hydraulics and patented electronics for long term performance. This 32 inch high blade is constructed with a 12 gauge steel welded moldboard designed with slot and lock engineered components. The tallest straight plow series in the Sno-Way line is available in 8’6”, 9’0” and 10’0” lengths. This 32 Contractor Series Straight plow is made for the professional who needs to get the job done. This snowplow comes standard with our patented Down Pressure® hydraulic system allowing the savvy contractor to add 250 lbs of down force at the touch of a button. Add the optional E-Z Switch™ wings and you will double the capacity of the 32 Contractor making you the smartest player in the business. Sno-Way engineers solutions that make sense and the E-Z Switch™ wings make sense for those wanting to double their snow-moving capabilities without destroying the integrity of the base blade system. So, add the wings, move more snow and crush the competition.

*Plow weight does not include weight of vehicle mount.*

Sno-Way’s patented Down Pressure® snow plow hydraulics is by far the ultimate plow upgrade and only Sno-Way has it. No other plow manufacturer offers this option. Some may claim that their heavy weight plows produce results like Down Pressure® snow plow hydraulics, but take it from us — the leader in D.P. technology — no plow will clean as efficiently or as quickly as a Sno-Way plow. Sno-Way’s Down Pressure® snow plow hydraulics allows you to scrape or backdrag more snow in less time resulting in 30% more efficiency.

The Heart of the SNO-WAY Down Pressure® System
**Reduces Load**
on front axle and 
wear and tear on 
axle, tires and frame.

**Better Grip and Control**
because of weight 
shift to rear axle.

### 30% MORE EFFICIENCY WITH DOWN PRESSURE® HYDRAULICS

1. **MOVE MORE SNOW**  
   » Apply Down Pressure® in heavy, wet snow to keep the blade on the surface and collect more snow in one pass.

2. **MORE TRACTION**  
   » Down Pressure® increases traction which also increases efficiency because of less tire spinning. This also reduces the risk of accidents.

3. **LESS WEAR & TEAR**  
   » Down Pressure® creates less force on front axle reducing the chance of breakage and the need for rebuilding of the suspension.

4. **FUEL & SALT COSTS**  
   » Down Pressure® eliminates the skim layer that all other plows leave = reduction in passes = saving fuel and using less salt.

5. **GO GREEN**  
   » Down Pressure® reduces your fuel usage and prevents breakage, resulting in fewer parts in landfills and less salt dumped on the road.

Visit [snoway.com](http://snoway.com) for video, updates and so much more.
A great amount of plowing takes place in the middle of the night so great lights are a necessity to hard-working plowers. The Sno-Way PlowPro Lights provide the maximum output allowable by law. This ensures you will see your way through the storm.

**No Relays. No Modules. No Downtime.**

**What EIS is:** Sno-Way’s patented EIS plow light connection system simply interrupts the truck lighting circuit to redirect energy to the plow lighting system. EIS is standard on all Sno-Way truck plows.

**Key Energy Interruption System™ Benefits**

» **Down-Time Reduction:** Any commercial plower will tell you how they lost time and money when they fried a relay at 3 A.M. The super simple design of the EIS system eliminates all failure-prone relays and modules.

» **Corrosion Elimination:** The enemy of electrical plugs is corrosion. Corrosion is caused by salt and water – both ever-present in the world of plowing. The Sno-Way EIS system uses military-grade connectors that do not allow moisture in when in use or during storage.

» **Simple, plug-and-play design:** Sno-Way’s EIS™ system is so simple, it takes merely seconds to connect or disconnect the plow lights to your vehicle. The mating faces can only plug in one way and provide a positive fit in all weather conditions.

» **EIS™ Installs quickly and cleanly:** Sno-Way’s EIS™ system uses only one main electrical harness for all vehicle makes and models. Without relays or large modules, installation is the cleanest and fastest in the industry.

Sno-Way’s EIS™ uses military grade electrical connectors.
Maximum Output. Easy to Adjust.

A great amount of plowing takes place in the middle of the night so great lights are a necessity to hard-working plowers. The Sno-Way PlowPro Lights provide the maximum output allowable by law. This ensures you will see your way through the storm.

STRONGER SUPPORT

Using our design and build capabilities, we built a custom mounting plate for the Sno-Way PlowPro Lights that allows for lightning-fast forward and back and side-to-side adjustment. This design ensures a positive fit which reduces vibration and increases bulb life.

DID YOU KNOW

EIS™ is designed to work seamlessly with the 4-Sight accessory lighting system. See page 28 for more.
PROCONTROL II™
Intuitive Wireless Control Design.

Unlike the competition, Sno-Way’s patented wireless Pro Control II™ plow control offers the ultimate in-cab flexibility. The Sno-Way wireless control can be mounted virtually anywhere in the cab and is simple to operate with either hand. In addition, the wireless Pro Control II™ eliminates cumbersome dash wires that can easily become tangled or restrict placement of the control - especially for left hand use. The wireless Pro Control™ II keeps your truck cab in original condition and installs in minutes with ZERO drilling or wire harness "snaking" through the vehicle firewall. A wired version is also available.

**Wireless ProControl II™**
KEY BENEFITS

» Ergonomic Design Allows for Right or Left Hand and Comfortable Operation
» Custom Macro Settings Allow the Operator to Program Three (A-B-C) Unique Plow Settings
» Down Pressure Hydraulics Button Allows for an Instant 250 pounds of Downward Force
» Control is Backlit for Night Time Use
» No Dash Wires – Installs in Minutes with Zero Drilling
» Control Works with All Sno-Way Plows
» Will operate Both Plow and Tailgate Spreader at the Same Time
Early Sno-Way plow designs used an easy-on, easy-off plow mount system – the first to remove the complete plow and power pack unit from the vehicle. Today, Sno-Way has built on its reputation for efficient, innovative technology to provide an easy-to-use, super fast Drive-In Mount System.

Sno-Way’s hydraulic-assist plow mount attaches itself to the vehicle subframe. The driver simply positions the vehicle in line with the mount and uses the control (wired or wireless) to positively connect the plow. As a safety feature, Sno-Way’s standard control can be easily disconnected from the harness in the cab and reconnected at the power pack on the plow. This industry-first design allows the driver to control the movement of the plow without standing between it and the vehicle (a common hazard among the competition).

Aside from its speed and simplicity, Sno-Way’s Drive-In Mount System is standard equipment and not an option like some competitor’s plow mount systems. You won’t pay extra to hookup a Sno-Way on your truck. Available as standard equipment on all Sno-Way plows.

3 Easy Steps…

1. Simply drive in
   - Tapered surfaces provide for ease

2. Rotate light bar back
   - Moving light bar causes mount pins to seat in the right place

3. Lock mount handles and pull up jack stand
   - Spring loaded handles will snap into place

ACCESSORIES designed to fit your plow.

Engineered by Sno-Way for maximum performance and perfect fit, factory-original Sno-Way parts and accessories put your plow into productivity overdrive. All Sno-Way parts and accessories include a one-year limited warranty when installed by an authorized Sno-Way Retailer.

PLOW BLADE GUIDES

Bright colors for high visibility in inclement weather, Sno-Way's flexible blade guides help identify the plowing width of your blade while plowing. Constructed with a braided cable core, these durable guides will flex under ½" diameter x 26" long and includes four 5/16"–18" x 1” hex head cap screws, washers and nylon insert lock nuts.

SNO-WAY® E-Z FIT SNOW DEFLECTORS

Sno-Way’s E-Z Fit snow deflector design includes enhanced curvature for optimum snow-rolling and deflection. The 3-piece design is constructed of High Molecular Weight Polyethylene (HMPE), a super-slick material with excellent impact resistance in cold temperatures. Sno-Way’s unique, molded reinforcement rib design provides superb rigidity and allows each deflector to overlap one another. The deflector will install on all Sno-Way straight blade widths from 6 feet to 10 feet and the 29VHD. Each deflector includes the steel mount hardware.
Bright colors for high visibility in inclement weather, Sno-Way’s flexible plow blade guides. Constructed with a braided cable core, these durable guides will flex under the most demanding plowing conditions. Each guide measures ½” diameter x 26” long and includes four 5/16” – 18” x 1” hex head cap screws, washers and nylon insert lock nuts.

ACCESSORIES

Limited warranty when installed by an authorized Sno-Way Retailer. snoway.com

E-Z Switch™ Wing System

Sno-Way offers the E-Z Switch™ 3” Box Wing and 9” Scoop Wings sold in sets of two. Add these to your 29HD or 29VHD for added snow moving capabilities.

E-Z Fit Poly Blade Kit

Sno-Way offers a poly skin insert kit for use on the Revolution™ HD, 29HD, 29R and 26 Series plows. You no longer need to have a special blade to have the benefit of a poly blade. You can place the E-Z Fit Skin Insert on your current blade and you have a new poly blade, ready for the snow to slide off. The kit consists of retainer brackets, poly skin with decal and all necessary hardware.

Snow Plow Emergency Parts Kits

Sno-Way’s emergency parts kits keep your rig stocked with the most common field service parts in the event of an untimely part replacement or plow repair. All parts are packaged in a durable plastic case (13.5” x 11” x 3.25”).

PLOW PARKA

This long-lasting plow cover is constructed of solution dyed, urethane-coated polyester. It doesn’t fade, is waterproof and prevents unraveling. It includes a heavy-duty 1/4” diameter bungee cord sewn into the bottom edge for a tight, weather resistant fit, along with a vinyl reinforcement patch to protect cover from wearing on the hook up area. The cover takes seconds to install, and provides protection against all of Mother Nature’s elements. A rubber tie down is included that hooks into brass spur grommets for extra holding power.

Controller Wall Charger

## Plow Specifications

### Plow Dimensions
- **Plow Width (Transport)**: N/A, N/A, N/A
- **Blade Width**: 102", 108", 120"
- **Hydraulic Wing Width**: N/A, N/A, N/A
- **Blade Height**: 31.5", 31.5", 31.5"
- **Blade Thickness**: 12 gauge, 12 gauge, 12 gauge
- **Wing Thickness**: N/A, N/A, N/A
- **Vertical / Diagonal Ribs**: 7 / 0, 7 / 0, 7 / 0
- **Wing Cutting Edge**: 1/2" x 6" (gr. 1080 Steel), 1/2" x 6" (gr. 1080 Steel), 1/2" x 6" (gr. 1080 Steel)

### Plow Specifications
- **Blade Height**: 8° - 30° Angle Plowing Width
- **Blade Width**: 96" - 471 lbs.*
- **Vertical / Diagonal Ribs**: 5 / 0, 5 / 0
- **Plow Lights with EIS™ Technology**: Dual Halogen, Dual Halogen
- **Trip Springs**: 2, 2
- **Drive-in Mount System**: Standard, Standard
- **Weight**: 704 lbs.**, 718 lbs.**, 758 lbs.**

### Representative Vehicle Applications

#### 32 Contractor
- **Chevrolet**: 2500 Silverado, 3500 Silverado
- **GMC**: 2500 Sierra, 3500 Sierra
- **Dodge**: Ram 1500, Ram 2500

#### Revolution™
- **Chevrolet**: 2500 Silverado, 3500 Silverado
- **GMC**: 2500 Sierra, 3500 Sierra
- **Dodge**: Ram 1500, Ram 2500

#### 29VHD
- **Chevrolet**: 2500 Silverado, 3500 Silverado
- **GMC**: 2500 Sierra, 3500 Sierra
- **Dodge**: Ram 1500, Ram 2500

### Series 29R
- **Blade Width**: 106" - 96"
- **30° Angle Plowing Width**: 92" - 83"
- **Weight**: 705 lbs.**, 590 lbs.**
- **Vertical / Diagonal Ribs**: 5 / 0, 5 / 0
- **Plow Lights with EIS™ Technology**: Dual Halogen, Dual Halogen
- **Trip Springs**: 2, 2
- **Shock Killer™ System**: Standard, Standard
- **Down Pressure™ Hydraulic System**: Standard, Standard
- **Wireless Pro-Control™**: Optional, Optional
- **Drive-in Mount System**: Standard, Standard

### Series 26R
- **Blade Width**: 106" - 96"
- **30° Angle Plowing Width**: 92" - 83"
- **Weight**: 705 lbs.**, 590 lbs.**
- **Vertical / Diagonal Ribs**: 5 / 0, 5 / 0
- **Plow Lights with EIS™ Technology**: Dual Halogen, Dual Halogen
- **Trip Springs**: 2, 2
- **Shock Killer™ System**: Standard, Standard
- **Down Pressure™ Hydraulic System**: Standard, Standard
- **Wireless Pro-Control™**: Optional, Optional
- **Drive-in Mount System**: Standard, Standard
