It is more than a slogan... it is the heart and soul behind every Sno-Way® product. Our relentless pursuit to design and manufacture the most durable and efficient plows is what makes the Sno-Way name the strongest in the industry.
CHOOSE THE RIGHT PLOW

**Light Commercial**
You plow your long driveway, mom’s driveway, your small shop lot and you make a few bucks when it really piles up.

**Mid Commercial**
When the white stuff falls, you’re out to make some green. You probably have a few guys who work for you. Parking lots and driveways are the bulk of your business.

**Commercial**
You’re serious about plowing and at the top of your game. You have a full crew of hard-working plowers who know how to move snow efficiently. Together, you plow virtually everything except the roadways.

### Application:

**Light Commercial**
- **Blade:** 22 Series
- **Truck:** Downsized Trucks & SUVs

**Mid Commercial**
- **Blade:** 26 Series
- **Truck:** 1/2 Ton

**Commercial**
- **Blade:** 29HD Series
- **Truck:** HD 1/2 Ton, 3/4 Ton, 1 Ton

### STRAIGHT PLOWS
Sno-Way can fit more truck applications using high strength steels and custom-designed components. While the mount, control and electrical systems allow a single plow-user maximum snow-moving, the systems are absolutely perfect for fleets as it is painless to move from truck to truck.

### R-SERIES PLOWS
Revolution plows are well, revolutionary - they sport independent hydraulic wings on both ends. These are the only truck plows in the world that can be turned from a straight plow to a scoop plow to a curb plow in seconds — all from your cab.

### V-SERIES PLOWS
Sno-Way V-Plows clean better, scrape better and back drag so much better than any plow on the market. Our V-Plows do not overweight your truck and provide an even payload experience which keeps all four wheels in full contact with the pavement.
SERIES 2 is comprised of our patented ESS plow light connection. Instead of hooking up to a truck’s computer, which can create problems with flashing and shut downs, Sno-Way’s ESS System manages LED thermosensitive marker lights, turn signals, high beams and low beams by tapping into the battery of the truck.

With the Pro Control 2 Plus, making changes on the fly is super easy along with one power harness and one harness for lights and control — a single system that fits on every truck... making your fleet completely interchangable.

Series 2 Package
- LED Thermosensitive Heated Lights
- Pro Control 2 Plus
- Upgraded Hydraulics Package
- Outboard Mount Stand
- Complete Fleet 2-Plug Connection System
- ESS™ — Energy Smart System

- LED Thermosensitive Heated Lights
  Custom LED lights are thermosensitive and heat only when needed, plus reduces unnecessary power drain on your system.

- Pro Control 2 Plus
  (controls plow & lights)
  Puts the driver in control of plow positions and brightness and dimms with the touch of a button from inside the cab.

- Series 2 Hydraulics Package
  Locates the power of your plow on the upper light bar. Improves hose routing for better hydraulic efficiencies, access for service and pump protection.

- Outboard Mount Stand
  Mount stands simplify the attachment and detachment of your plow to your truck.

- Two Plug System
  One 4-gauge power plug — one connector for lights and control. This system is the same for all plow models for complete fleet interchangability.

- ESS™ — Energy Smart System
  One system fits every truck. No more truck specific light systems. Fleet owners can move any plow to any truck without extra expense.
Control your plow and spreader with the ergonomically designed Pro Control 2 Plus — offered in a wired configuration or patented wireless design — which provides the ultimate in-cab mounting flexibility.

**Key Benefits:**

- **Ergonomic Design**
  Allows for comfortable right or left hand operation
- **Customized Settings**
  Customize your macro settings to program your own unique plow configurations (A-B)
- **Reactive Down Pressure® Hydraulics**
  With the one-time push of a button, this system is ALWAYS reactive to the landscape you’re plowing — adding 250 pounds of downward force, no matter the terrain
- **Backlit & No Dash Wires**
  Control is backlit for night time use... installs in just 5 minutes with ZERO drilling
- **Dual Controls**
  Will operate both plow and tailgate spreader at the same time
- **Works with all Sno-Way® plows and tailgate spreaders**

**DRIVE-IN MOUNT SYSTEM**

Drive in... let the plow do the rest

Check online to see a video and specifics on this system —

Our hydraulic-assist plow mount attaches itself to your vehicle sub-frame. The driver simply positions the vehicle in line with the mount and uses the control to positively connect to the plow. This industry-first design allows the driver to safely control the movement of the plow without standing between the vehicle and the plow.

**Standard on all Sno-Way® plows!**

- **DRIVE-IN**
  Tapered surfaces provide for easy entry...
- **ROTATE LIGHT BAR**
  Moving light bar head causes mount pins to seat...
- **LOCK HANDLES**
  Spring loaded handles snap into place.

**PLUG & PLAY**

**ESS Connection**

ESS allows fleet owners to move any plow to any truck without the expense of installing a separate lighting harness system.

**Brain Box**

This compact computer allows ESS to solve four big problems:
- Computer problems
- Flashing problems
- Shut-down problems
- Transferring plows to other trucks

**ESS ENERGY SMART SYSTEM**

No relays. No modules. No downtime. No kidding.

Sno-Way’s patented ESS™ plow light connection system simply removes the truck lighting circuit from the plow lighting system. The Energy Smart System is standard on all 1/2 ton truck or larger Sno-Way truck plows.

**Key Benefits:**

- **Downtime reduction**
  Eliminates all failure-prone relays
- **Corrosion elimination**
  Military grade connectors keep moisture out (in use or in storage)
- **Simple, plug-and-play design**
  Making basics fit only one way — helps in all weather conditions
- **Installs quickly and easily**
  Cleanest and fastest in industry — uses only one electrical harness
- **Complete Fleet 2-Plug Connection System**
  Can move ESS system from one truck to another without any additional costly components

With ESS, adaptor harnesses are never needed. Switching plows throughout your fleet is super-simple at no additional cost.
Sno-Way’s patented Down Pressure® hydraulics is by far the ultimate plow upgrade. This reactive system automatically turns on and off by following the contours of the terrain you’re plowing — always applying 250 pounds of down force — even after stacking. Some may claim they have a down pressure system that produces results like ours, but take it from us — the leader in Down Pressure® Technology — no plow will clean as efficiently or as quickly as a Sno-Way® plow.

Some of the benefits include:
- **Move More Snow**
  - Apply Down Pressure® in heavy wet snow to keep the blade on the surface and collect more snow in one pass.
- **More Traction**
  - Down Pressure® increases traction which also increases efficiency because of less tire spinning. It also reduces the risk of accidents.
- **Less Wear & Tear**
  - Down Pressure® creates less stress on your front axle reducing the chance of breakage and the need for rebuilding of the suspension.
- **Fuel & Salt Costs**
  - Down Pressure® eliminates the skim layer that all other plows leave = reduction in passes = saving fuel and using less salt.
- **Go Green**
  - Down Pressure® reduces your fuel usage and prevents breakage, resulting in fewer parts in landfills and less salt dumped on the road.

**Cleaner plowing = less time, less fuel & less salt.**

**SNO-WAY® INNOVATIONS**

- Ground Hugger™ Plows
- Double Hinge Plows
- E-Z Switch™ Wing System
- MaxADJUST™ Leveling
- Down Pressure® Hydraulics
- No Gap Hinge Mechanism
- ESS™ Lighting Package

Big Blade Results for Downsized Trucks

Whether you’re looking to plow out your driveway, help out a neighbor or upfitting a downsized vehicle to handle your small commercial lots, Sno-Way 22 Series plows give you big blade results in a compact snow plow package.

Features:
- **EIS™** — Energy Interruption System
  - Down-time reduction
  - Corrosion elimination
  - Plug and play design
- Patented Ground Hugger™ Blade Design
  - Keeps plow on the ground
- Ultra High Strength Steel Components
- Polycarbonate Blade Skin
- Specific Angle & Raise Cylinder Designs
  - Special designs are lighter weight and same force as larger cylinders
- Special Design Trip Springs

**Blade Width**
- 6’8”
- 7’6”

**30° Plowing Width**
- 69”
- 78”

**Blade Height**
- 22”

Reactives DownPressure® Hydraulics System

- Scraps clean forward and back dragging
- Increases snow-moving efficiency 30%
- Follows terrain automatically

Moving snow has never been easier than with a RevHD Series 2 plow.
Blade & wing configurations are at your control — positioning is limitless!

Series 2 Package
- LED Thermosensitive heated Lights
- Pro Control 2 Plus (controls plow & lights)
- Upgraded Hydraulics Package
- Outboard Mount Stand
- Complete Fleet 2-Plug Connection System
- ESS™ — Energy Smart System

Patented double plow wings that pivot independently up to 150° allows plowers to turn their machines from a straight plow to a box plow (and everything in between). Most plowers see their plowing time cut in half.

Patented Ground Hugger™ Blade Design

Pre-Drilled Top Blade Rail
- Allows for E-Z Installation of E-Z Fit Deflector

150° Hydraulic Wing Rotation
- Infinite Snow Moving Adjustability
- Blade and wings stay parallel to the ground

- **Drive-in Mount System**
  - Outboard leg stands for simple and safer operation

- **Flared Wing Design**
  - Moves more snow

- **Shock Killer™ Trip Return System**
  - Reduces return shock to truck and driver

- **Integrated Curb Guard**
  - Superior cleaning for commercial applications

- **Reactive Down Pressure® Hydraulics System**
  - 250 lbs. down pressure makes backdragging a breeze
  - Scrapes clean forward and back dragging
  - Increases snow-moving efficiency 30%
  - Follows terrain automatically

INNOVATIONS & FEATURES

- **INNOVATIONS & FEATURES**
  - **V-Series Flared Wing Plows**
  - **Series 2 Hydraulics System**
    - More efficient with increased force
    - Easy Access
  - **Drive-in Mount System**
    - Outboard leg stands for simple and safer operation
  - **Flared Wing Design**
    - Moves more snow
  - **Shock Killer™ Trip Return System**
    - Reduces return shock to truck and driver
  - **Integrated Curb Guard**
    - Superior cleaning for commercial applications

- **SERIES 2 MaxADJUST™ Leveling System**
  - Safer and easier to adjust plow

- **No Gap Hinge Design**
  - Reduces snow trails

- **Reactive Down Pressure® Hydraulics System**
  - 250 lbs. down pressure makes backdragging a breeze
  - Scrapes clean forward and back dragging
  - Increases snow-moving efficiency 30%
  - Follows terrain automatically

- **Patented MaxADJUST™ Leveling System**
  - Allows the user to make adjustments while standing in front of the plow instead of from underneath.
The 26V Series 2 is 8 feet wide with a flared wing design. It is specifically made to provide 1/2 ton trucks superior snow moving capability. The unique Ground Hugger™ blade design keeps the blade on the ground and the patented MaxADJUST™ Leveling System enhances cleaning.

You MUST see your retailer or check online application guide for current truck application information.

The wired or wireless Pro Control 2 Plus allows for easy one-touch button control.
The 29VHD Series flared wing V-Plow has our patented Ground Hugger™ blade design coupled with the MaxAdJUST™ Leveling System to keep the plow on the ground with optimal alignment that eliminates snow trails. Sno-Way’s Patented MaxADJUST™ Leveling System allows the user to make adjustments while standing in front of the plow instead of from underneath. The operator can adjust the center hinge for perfect plowing alignment and eliminate a snow trail. This system allows for easy use on fleets that use more than one type of truck model because there is no plow frame disassembly necessary for proper fit to each truck.

- **Series 2 Package**
  - LED Thermosensitive heated Lights
  - Pro Control 2 Plus (controls plow & lights)
  - Upgraded Hydraulics Package
  - Outboard Mount Stand
  - Complete Fleet 2-Plug Connection System
  - ESS™ — Energy Smart System
- **Patented MaxADJUST™ Leveling System**
- **Patented Ground Hugger™ Blade Design**
- **Pre-Drilled Top Blade Rail**
- **Patented Shock Killer™ Trip Return System**

**SNO-WAY.COM**
Engineered by Sno-Way® for maximum performance and perfect fit, factory-original parts and accessories put your plow into productivity overdrive.

**1-year Warranty** All Sno-Way® parts and accessories include a one-year limited warranty when installed by an authorized Sno-Way Retailer.

---

**E-Z Fit Snow Deflector**

Sno-Way’s E-Z Fit snow deflector design includes enhanced curvature for optimum snow-rolling and deflection. The 3-piece design is constructed of High Molecular Weight Polyethylene (HMPE), a super slick material with excellent impact resistance in cold temperatures. Unique molded reinforcement rib design provides superb rigidity and allows each deflector to overlap. Installs on all straight blades from 6’ to 10’ — also available for V-plows (Includes hardware)

**EIS to ESS Conversion Kit**

EIS to ESS Conversion Kit — No Lights

Convert EIS wiring system to ESS wiring system while keeping the existing halogen lights.

**Rubber Deflector**

Heavy-duty rubber deflector material — perfect for directing snow down, while providing forgiveness should you run into an obstacle or a heavy pack of snow.

**3/8” Steel Cutting Edge — 22 SERIES**

Heavy-duty steel cutting edge for use on 80” and 90” plows. The 3/8” design provides increased cutting edge durability and longer wear life than standard 1/4” plow edges.

**VCM Plow Mount Conversion Kit**

Allows older 3-point mount systems to fit current model sub-frames by replacing the standard Vehicle Center Member.

**EIS to ESS, plus Halogen to LED Conversion Kit**

Allows older 3-point mount systems to fit current model sub-frames by replacing the standard vehicle Center Member.

**E-Z Switch Wings**

29HD straight plows are engineered to accept the E-Z Switch Wing System™. Choose from a 3” Box Wing or a 9” Scoop Wing to increase snow moving capacity.

**3/4” Poly Cutting Edge — 22 SERIES**

Our 22 Series cutting edges are 3/4” thick and are made of UHMW polyethylene. Durable and ideal for snow removal on decorative surfaces, paving stones, or cement driveways.

**Plow Blade Guides**

Bright colors for high visibility in inclement weather; flexible blade guides help identify the plowing width while plowing. Constructed with a braided cable-core, these durable guides will flex under the most demanding plowing conditions.

**3” Box Wing**

**9” Scoop Wing**

**1/2” Steel Cutting Edge — 29R, 29HD & 26 SERIES**

Sno-Way offers a 1/2” thick heavy-duty steel cutting edge. The 1/2” design provides increased cutting edge durability and longer wear life than the standard 3/8” steel edge.

**4-Sight™ Plow Lighting System**

Uses your existing truck and plow lights together to illuminate your work area. 4-Sight™ installs on EIS plows in 15 minutes or less. With Sno-Way’s 4-Sight™ you have the option of installing the system to work with either the low or high beams on your truck.

**E-Z Switch Wings**

29HD straight plows are engineered to accept the E-Z Switch Wing System™. Choose from a 3” Box Wing or a 9” Scoop Wing to increase snow moving capacity.

**3/8” Steel Cutting Edge — 22 SERIES**

Heavy-duty steel cutting edge for use on 80” and 90” plows. The 3/8” design provides increased cutting edge durability and longer wear life than standard 1/4” plow edges.

**1/2” Steel Cutting Edge — 29R, 29HD & 26 SERIES**

Sno-Way offers a 1/2” thick heavy-duty steel cutting edge. The 1/2” design provides increased cutting edge durability and longer wear life than the standard 3/8” steel edge.

**Plow Shoes**

These optional cast-iron shoes help extend the wear life of the plow cutting edge. Each shoe includes a spacer and multiple washers for simple adjustment. Shoes are easily secured to (and removed from) the plow with locking Lynch pins.

SNO-WAY® ACCESSORIES

Move it
ADDITIONAL ACCESSORIES

■ Anti-Corrosion Compound
Film-conductive compound that effectively seals against dirt and moisture and provides maximum protection — apply liberally to all exposed electrical components for extended wear life.

■ Plow Parka
Long-lasting plow cover constructed of solution dyed, urethane-coated polyester — waterproof, prevents unraveling and doesn’t fade. Includes heavy duty 1/4" diameter bungee cord sewn in bottom edge for a weather resistant fit.

■ Snow Emergency Parts Kit
Be ready for anything... All parts are packaged in a durable plastic case (13.5" x 11" x 3.25"").

■ Controller Wall Charger
Designed for use with both the Pro Control II™ and Pro Control 2 Plus wireless snow plow controllers. Typically re-charges unit within 30 minutes.

■ High Performance Touch Up Spray Paint
Sno-Way touch-up paint is custom matched to help conceal chips and scrapes and to protect your equipment from corrosion. All colors are available in 12-ounce aerosol cans.

■ E-Z Fit Poly Blade Kit
Sno-Way offers a poly skin insert kit for use on the Revolution™HD, 29HD, 29R and 26 Series plows. You no longer need to have a special blade to have the benefit of a poly blade. You can place the E-Z Fit Skin Insert on your current blade and you have a new poly blade, ready for the snow to slide off.

■ Anti-Corrosion Compound
Non-conductive compound that effectively seals against dirt and moisture and provides maximum protection — apply liberally to all exposed electrical components for extended wear life.
